

JOHN E. HUTCHINSON

ABSTRACT. This is the abstract

CONTENTS

1. Introduction	1
2. Preliminaries	1
3. Main result	1
References	1

1. Introduction

This is the introduction, blah blah

2. Preliminaries

- To track references remove % in front of “usepackage showkeys” in the preamble.
- The hyperref package is very convenient for going, in the online version, from the table of contents to any part of the paper, from equation references to the equation, similarly for citations, etc. etc.
- The bibliography is easily constructed using MATHSCINET
Go to: <http://www.ams.org/mathscinet/searchauthors.html> then enter “russell, b*”
Click Search, select the correct author
Select the paper and do a “Batch Download — Citations (AMSRefs)”
- For standard width and height comment out all the “addtolength” lines in preamble.

3. Main result

(1) $1 + 1 = 2$

For a proof of (1) first read the 400 pages in [WR62] and then find a copy of the complete version of *Principia Mathematica*. The result is on approximately page 490.

REFERENCES

- [WR62] Alfred North Whitehead and Bertrand Russell, *Principia mathematica* to *56, Cambridge University Press, New York, 1962.
